

Complete Guide to Prepaid Meter Codes in Kenya (2024 Update) – CIU Codes, KPLC Smart Meter Codes & PDF Download

Prepaid meters have become the standard electricity billing method for homes and businesses across Kenya. Whether you are using Inhemeter, Conlog, Clou, Actaris, or other KPLC-approved meter models, it is important to know the correct prepaid meter codes to check your balance, retrieve your meter number, troubleshoot errors, or pair your meter with a Customer Interface Unit (CIU).

At Moffam Electricals, we handle hundreds of calls from clients who struggle with failed token loading, CIU not responding, meter pairing problems, or repeated error codes. To help Kenyan electricity users, we have prepared the most comprehensive prepaid meter codes guide, including a downloadable Prepaid Meter Codes PDF.

This PDF covers everything you need, from KPLC token meter codes, commissioning codes, troubleshooting codes, tripping codes, pairing codes, and meter number codes, to how to check your KPLC meter number instantly.

How to Check Your KPLC Token Meter Number (All Meter Brands)

Conlog: Dial #100#

Inhemeter: Press 000

Clou: Enter 100

Actaris (white or black): Use 065, 804, or 99

Universal Code: Some meters respond to Enter → 00075 or Enter → 55555.
